Protoraë Law is dedicated to protecting our clients through sound federal and state tax planning based on each client's situation, motivations, and goals. From state nexus checkups for our multistate clients, to business planning and formation, our experienced and highly skilled attorneys will provide the best options to drive your success. We have helped many large and small businesses, non-profits, and individuals successfully plan for new and existing federal and state tax provisions applicable to their situation.

And if you should find yourself in a dispute with a taxing authority, we can help. Our solution-forward approach with taxing authorities properly frames tax issues for resolution, creating a more receptive audience for advantageous negotiation. However, if an acceptable resolution cannot be reached through negotiation, then we will zealously advocate on your behalf in administrative or other legal proceedings against the IRS or any other taxing authority.
